

# Bug Report: Phone Number Input Validation Issue J_12
# Description:
# The phone number input validation in the bot is not functioning correctly, leading to unexpected behavior.
# Steps to Reproduce:
# 1. Attempt to enter a valid phone number with an international prefix (e.g., +380).
# 2. Ensure that the number does not exceed 15 digits and contains only numerical characters and the plus sign (+).
# 3. Verify that the input does not contain any symbols other than the plus sign.
# 4. Enter a valid phone number with at least 10 digits.
# Expected Behavior:
# - If the entered phone number meets the specified criteria, the bot should display the message "Number added."
# Actual Behavior:
# - If the entered phone number is valid, the bot incorrectly displays the message "Fail."
# - If the entered phone number does not meet the specified criteria, the bot should display the message "WRONG NUMBER."
# Additional Information:
# - The issue seems to stem from the incorrect handling of valid phone numbers.
# - The validation process needs to be reviewed and adjusted to ensure accurate identification of valid and invalid phone numbers.
# Attachments:
# - Screenshots or code snippets related to the issue may be helpful for further investigation.

# Priority:  
# Very High

BUG REPORT J\_6

Data Info test
Name: 22,.";}{+-} (*&^%\$#@!~
Surname - 22,.";){+-} (*&^%\$#@!~
Email: fekis8*!^%\$#8@gmail.com
Number: 1
Defect Description/Steps to reproduce
1. Invite code on http://localhost:3000
Write in the field of Name *See Test Data
Write in the field of Surname *See Test Data
Write in the field of Email *See Test Data
Look at the field First Name
Write in the field of number *See Test Data
Expected Result
Validation : Incorrect FirstName
Must be Surname without symbols and numbers Validation : Incorrect
Surname Must be Surname without symbols and numbers Validation : Incorrect
Email Must be Email without symbols except dot
First Name
